CSC 495.002 – Homework#2: TED Talk Review

Dr. Özgür Kafalı
North Carolina State University
Department of Computer Science

Watch the following three TED talks on privacy, and write a review by taking into account the following points:

- Compare the privacy problem addressed in each talk.

- Why are they important problems, what implications do they have?

- What are the computational methods described in the talks? What are the motivations for developing them? How would they change the everyday lives of people?

- Which problem/talk is the most interesting to you, and what other similar problems would you be interested to solve? You can get creative here.

- Are there any points mentioned in the talks that you would disagree?

The deadline for this assignment is September 25th – 5PM. One page in total, Times New Roman 12 point, single column, single spaced.
